Export Data

CPK
100% 07/04/2012 09:29:15
Export Data
1. Record By Record
2. Sum Up Qty By Item
3. Back

For the exporting data, there are two methods as below:

1. Record By Record
2. Sum Up Qty By Item

User can press <1> or <2> to export data what he wants.

If user presses <1>, the data is exported a CSV file with Date, Time & Machine ID to \My Documents folder on the mobile device.

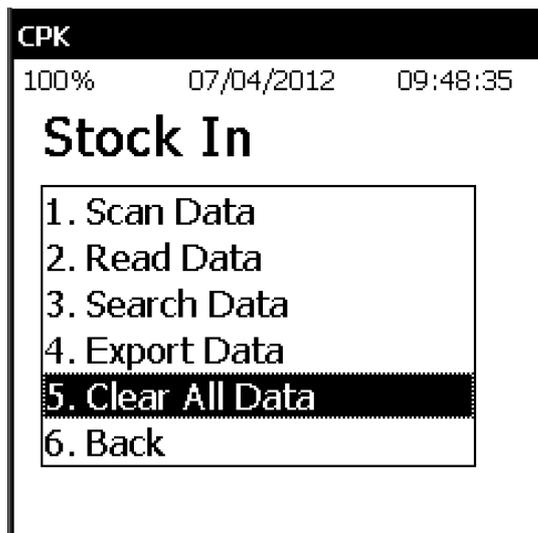

After exporting data, program will ask users that need delete all records of not. User can select <YES> or <No> as they want.

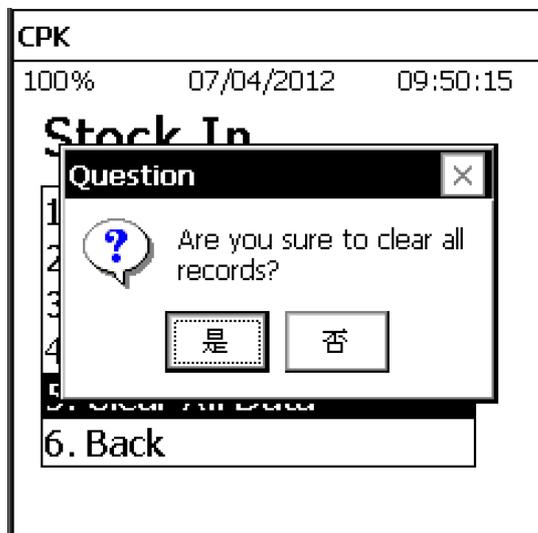

After exporting the CSV file successfully, user can get back the exported file through ActiveSync.

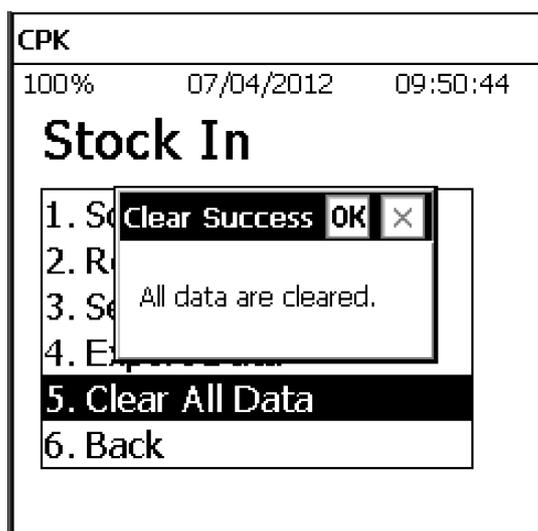

Clear All Data

User can perform clearing all data when pressing <5>.

There will be a question box for asking the user is sure to delete or not.

A message prompts out once all data are cleared.

Remark:

Pressing <ESC> button [F (Blue color button) + LEFT button] can help users to clear field data, back to previous field or leave the existing form.
